

## Laravel ajax post form data

I'm not robot!

Post form data using ajax in laravel.

In this Laravel jQuery Ajax Form Submit tutorial you'll learn to submit form data without reloading or refreshing of page using ajax. In this tutorial I'll show you step by step how to submit a form without reloading or refreshing of page using ajax. In this example we will be using jquery ajax submit handler for ajax form submission. Table Of Contents - In Laravel, to submit form data using ajax we must have to incorporate csrf token with form data and set X-CSRF-TOKEN request header with ajax form submit request. Before starting with example I assume that you already have fresh laravel 5.8 installation ready, if you have it installed then you can skip this step. Create Laravel 5.8 Application First of all we need to create a fresh laravel project, download and install Laravel 5.8 using the below command composer create-project --prefer-dist laravel/laravel larablog Now, lets create a MySQL database and connect it with laravel application. After creating database we need to set database credential in application's .env file. .env DB\_CONNECTION=mysql DB\_HOST=127.0.0.1 DB\_PORT=3306 DB\_DATABASE=larablog DB\_USERNAME=root DB\_PASSWORD= Generate Application Key Open terminal and switch to the project directory and run the following command to generate application key and configure cache. php artisan key:generate php artisan config:cache php artisan key:generate php artisan config:cache Locate the file "app/Providers/AppServiceProvider", and add following line of code to the top of the file use Illuminate\Support\Facades\Schema; use Illuminate\Support\Facades\Schema; and inside the boot method set a default string length as given below - Schema::defaultStringLength(191); Schema::defaultStringLength(191); So this is how "app/Providers/AppServiceProvider" file looks like -
